# DISCHARGE SUMMARY

St. Mary's Medical Centre

| | |
|---|---|
| **Patient** | Hassan Wilson |
| **MRN** | 3179055 |
| **DOB** | 14/06/1985 |
| **Admitted** | 18/03/2024 |
| **Discharged** | 25/03/2024 |
| **Consultant** | Dr S. Mehta |

## Reason for Admission

Hassan Wilson presented with markedly elevated blood glucose (fasting 14.6 mmol/L, HbA1c 10.6%) and symptoms of decompensated type 1 diabetes mellitus.

## Hospital Course

Treated for hyperglycaemia with fluid resuscitation and insulin. Diabetic foot and renal review completed; patient stabilised for discharge.

## Discharge Medications

| Medication | Dose & Frequency |
|---|---|
| Glimepiride | 1mg once daily |
| Sitagliptin | 50mg once daily |

## Follow-up Plan

GP review within 1 week. Diabetic clinic review with repeat HbA1c in 4 weeks. Maintain a low-glycaemic diet. Monitor fasting sugar at home twice weekly.
